Lenpart Ltd

OPEN 5 DAYS A WEEK

6AM -6PM

Conformity

All of our Tube conforms to the EN10255 British standard and are fully seamless. Our threads are produced by our Fully trained engineers. Using our Brand new Machines ensures our engineers are able to produce top quality parallel threads. Sockets are then threaded onto the pipe thread and lock into place ensuring that the tubes are smooth. We Internally wipe down our tubes and debur them to ensure no steel cuts are left inside the tube so they arrived to our clients All of our tubes are inspected and checked prior to being bundled.

Tube Dimensions

Nom Bore	OD
125mm(5")	139.7mm
150mm(6")	165.1mm

Specialist Production

Not only does our Production team do 6.5mtr and 3.25mtr lengths but we can offer bespoke cut to your required lengths these can then be threaded or left beveled and plain end ready for any puddle flanges!

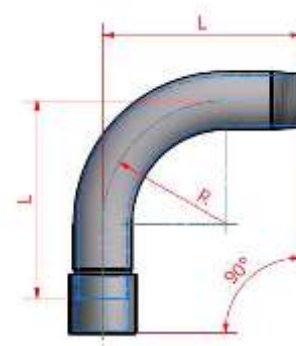

Top customer service

Our customers are very happy with the service they are offered from the start to finish with there products, with a very helpful team and quick turn arounds we help to ensure that your project moves smoothly! For example:

"Lenpart always offers a top service, great quality and efficient turnaround." —Long standing customer

Lenpart are also suppliers of 5" and 6" specialist bends as per below, don't forget to include any requirements for these also when you are placing your orders for your straight length tubes!!!
