

In Design

Technical Requirements:
1. The unnoted forging chamfer R1-R2 and the unnoted draft angle is 1-3 degree;
2. The forging surface should be clean, flat, and without any cracks, detention and other defects;
3. The markings of manufacturer brand, certification mark, manufacturing date and type specifications on work-piece is convex and the font height is 1mm.
The typecasting should be clean and legible;
4. Working pressure: 2.5MPa; performance test: withstand pressure of 8.5Mpa without damage;
5. Surface treatment: dacromet excluding the threads.
